CLAX® Crystal

33F1

High performance mainwash detergent

Description

Clax® Crystal 33F1 is a single shot mainwash detergent. Formulated for use in commercial and on-premise laundries. Suitable for cleaning fabric from healthcare, as well as cleaning hotel and restaurant linen. The product is best suited for soft water conditions and can be applied for washing all cotton and most polycotton fabrics. The product is suitable for preparing stable and clear stock solutions ensuring optimal dosing.

Features

Clax® Crystal 33F1 is based on a blend of soap, nonionics, sequesterants, alkaline salts, anti-greying and anti-corrosion agents and optical brightener. This product has been specially developed for preparing stable and clear stock solutions, thus ensuring optimal dosing and delivery of product.

The well balanced blend of soap and low foaming nonionics results in excellent soil removal and dispersion of soil components. In addition soap facilitates calendaring of flatwork on multi-roll calenders by acting as a lubricant and may render towels softer. In case of heavily soiled articles Clax® Crystal 33F1 should be used with alkalinity/builder and nonionic boosters.

Benefits

- Excellent performance on a wide range of stains and types of soils.
- Prevents greying of linen; stabilisation of soil particles in the wash liquor.
- Ensures long-lasting whiteness.
- Facilitates calendaring.
- Easy dosing from stable stock solutions.
- Prevents corrosion of machine parts.

Application areas

- Healthcare
- Lodging
- Government
- Commercial
- Laundry

CLAX[®] Crystal

33F1

Directions for use

1. Dose manually or prepare stock solution for automatic dosing.
2. Dose into main wash. Water level should be low and temperature around 80°C.

For best results use softened water. Segregate polyester cotton articles from other articles and wash separately. Separate white and coloured goods. Sub-sort into light, medium and heavily soiled articles.

Rinse with potable water at the end of the laundering process.

Dosage:

Light-medium soil: 6g/Kg,
Heavy soil: 12g/Kg dry goods.

In New Zealand : MPI Approved C33 (All animal product except dairy).
