Diversey

Diversey's purpose is to protect and care for people every day. Diversey has been, and always will be, a pioneer and facilitator for life. We constantly deliver revolutionary cleaning and hygiene technologies that provide total confidence to our customers across all of our global sectors, including: cleaning products, systems and services that efficiently integrate chemicals, machines and sustainability programs. This makes us unique among leading global hygiene and cleaning companies. Everything we do has our customers' needs at its heart and is based on the belief that cleaning and hygiene are life essentials. With over 95 years of expertise, we safeguard our customers' businesses, contributing to productivity improvements, lower total operating costs and brand protection. Headquartered in Fort Mill, South Carolina, USA, Diversey employs approximately 9,000 people globally, generating net sales of approximately \$2.6 billion in 2017.

For more information, visit www.diversey.com or follow us on social media.

Building Care

No one knows more about hard surface cleaning than Diversey. We have developed an unparalleled portfolio of leading brands including TASKI® Stride™ multi-surface cleaners, Crew™ restroom cleaners, TASKI® Glance™ glass and multi-surface cleaners, and TASKI® Good Sense™ air fresheners.

Dilution Control Systems

Diversey has a strong heritage in the innovation of dispensing systems. We are continually developing manual, water driven or electronic dosing systems that deliver application-specific solutions for our customers. Diversey strives to deliver diverse dispensing platforms to fit your needs. Systems range from the J-Fill™ QuattroSelect wall-mounted system, to the J-Flex™ portable dispensing platform and the non-water-fed portable SmartDose™ dispenser system.

Divermite™

Divermite offers maximum economy by combining a range of high-performance, highly concentrated kitchen cleaning products with an accurate dosing system.

- Compact range. Frequently used products for use in spray bottles, buckets or sinks.
- Predictable, low cost in use. Concentrated, effective formulations combined with accurate dosing improve cost-efficiency.
- Concentrated. One pouch = 300 triggers or 150 buckets.
- Easy to use. Colour-coded pouches & spray bottles for easy recognition.
- Easy to install. No plumbing or electrical connections required.

- 1 Closable lid
- 2 Quick pouch connection
- 3 Indicator for dosing
- 4 Push button
- 5 Bottle connector

IntelliDose™ Dispensing

TASKI® IntelliDose

TASKI IntelliDose is a chemical dilution system for scrubber driers that will help you to achieve consistently high cleaning results, control your costs and simplify your machine operation.

TASKI IntelliDose brings you:

- Consistency and quality of cleaning result
- Cost control
- Simplicity and safety
- Environmental benefits

Consistency and quality of cleaning result

Ensures always the right product and dilution rate for each task and floor type. This ensures best cleaning results and avoids potential floor damage caused by wrong product.

Cost control

The dilution control guarantees highest accuracy of the dosage with no over- and under-dosing possibility. As a result chemical consumption and costs are predictable. It is also possible to freeze dosage at preferred level by supervisor or Diversey technician.

Simplicity and Safety

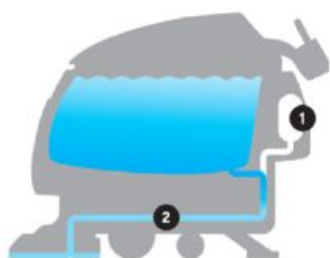

Easy operation and simple pouch changes. Use of closed pouches ensures no operator contact with open chemicals and handling of heavy canisters is not needed anymore.

Environmental benefits

Reduced chemical consumption and packaging material used. Tank of machine is only filled with water - as result no waste of un-used solution when draining the tank after use.

Superior chemistry and advanced technology allow machines to clean up to 30,000m² with just one pouch!

1. TASKI IntelliDose unit calculates and doses the precise amount of chemical for a perfectly diluted mixture every time.

2. TASKI IntelliFlow then uses speed dependent logic to deliver the precise amount of that mixture to the floor.

IntelliDose™ – Kits

J-Fill™ Dispensing

J-Fill™ QuattroSelect

QuattroSelect is a dilution control station that offers the very best of dilution control for large sites.

The lockable unit uses up to four super-concentrated chemicals simultaneously. Simply turn the smart valve selector to the desired product and begin filling. The unit offers two flow rates to make bucket and trigger filling timely and easy.

The system uses colour-coded super-concentrated products to make training easy, and with no neat contact of product for staff, it offers superior user safety.

J-Flex™ Dispensing

The J-Flex System

The J-Flex System brings you:

Accurately dosed concentrated products. The unique dosing head incorporated into the J-Flex pack is specially calibrated for each product and ensures that the right solution is available for use every time.

Versatility and flexibility

Because the J-Flex unit has the option to deliver two levels of dilution and water flow the same product can be used in spray bottle and bucket applications. The simple plug in hose connector makes the system truly portable.

Absolute reliability

The J-Flex system is unique in that the entire dilution control unit is disposable. This effectively eliminates the risk of breakdown or inaccurate dosing due to poor maintenance.

Simplicity and safety in use

With its simple “plug in – pull out” hose connector, its colour coded labels with clear application icons and dilution symbols, the J-Flex system is easy to train in and easy to use. The sealed “Spill Tite” packaging system ensures that operators can never come into contact with the concentrated product.

- 1 Bottle/bucket filling tube
- 2 Cart/bucket hanging bracket
- 3 Control knob - Selects high flow for bucket (large container) filling, low flow for bottle filling or just rinse water
- 4 Trigger control with lock feature (high flow only)
- 5 Vacuum break backflow prevention*
- 6 Quick connect water hook-up
- 7 Safe, Spill-Tite™ permanently attached head and bottle
- 8 Ergonomically-designed handle
- 9 Durable bottle for portable use
- 10 Recyclable head and bottle*

* Check local regulations (see J-Flex Operating Safety and Installation Instructions)

Optifill™ Dispensing

Suma® Optifill™

Ready to use out of the box, without complicated installation or training instructions, Optifill eliminates the hassles and problems associated with traditional systems. Unique to the manual warewashing market, this is the only non wall-mounted system which allows you to dispense just the right amount of chemicals time and time again to consistently meet your cleaning needs in the most efficient and sustainable way possible.

One simple, self-contained unit does so much. Suma Optifill automatically dispenses chemicals to water in exact amounts. In addition to this, with our strong performing cleaning chemicals – both detergent and sanitizer, you're sure to achieve consistently clean results time and time again.

These results can be attributed to the innovative design and the special features of the system itself which are highlighted below.

- | | |
|---|---|
| 1 Water inlet – operating range of 4 to 8 GPM and 15.12 to 30.24 LPM* | 5 Concentrated detergent or sanitizer – generates 6250 litres from a single bottle – about 100 - 150 sink fills (dependent on sink size) |
| 2 Internal pumping system – accuracy over wide water flow regardless of water pressure or hardness | 6 Non slip grip – ergonomic, textured easy-grip hand hold |
| 3 Discharge outlet – twice as fast as other dilution control systems** | 7 Spill Tite™ seal – captive, tamper-proof package |
| 4 Adjustable divider slide – fits a range of sink dividers (sizes from 0.3cm to 7.3cm) | |

* A water stream drop height of 4" to 8" (10cm – 20cm) is advised

** Such as Venturi or Eductor systems

SmartDose™ Dispensing

SmartDose

SmartDose is an innovative dosing platform for super concentrate daily cleaners and disinfectants setting a new industry benchmark of accuracy, simplicity and safety for the users without the need for a connected water supply.

The Smart pump technology is very practical and uses icon based instructions. This makes it possible to vary shot sizes for any of the different cleaning methods including spray cleaning, bucket cleaning or scrubber driers, but requires minimal user training and no measuring. And being a closed system, it provides the maximum level of safety and cost control.

SmartDose also dramatically reduces the environmental footprint of all its users and is fully recyclable.

SmartDose offers packaging, chemical, storage as well as transport benefits versus standard platforms.

- 1 Ergonomic Handle - Comfortable for all hands.
- 2 Easy-to-Use System with Simple Icons - No measuring needed, increasing productivity, minimal training required
- 3 Shaped Leak- and Drip-Resistant Spout - Keeps concentrated product away from surfaces & users
- 4 Spill-Tite™ Sonically Welded Head - Captive system eliminates tampering & dangerous refilling
- 5 SmartDose Pump - Automatically calculates two precise doses of concentrate to ensure consistent dilution rates & cost control. Eliminates guesswork and partial dosing
- 6 Environmentally Sustainable - Highly concentrated products reduce plastic use and transportation. Bottle is made with 25% post consumer content and is 100% recyclable
- 7 Complete Bottle Evacuation - Bottle and pump design ensures 99.9% concentrate evacuation
- 8 No Water Hook-up Needed - Portable, maintenance and service-free, one-time use system. Eliminates need for backflow prevention

Fabric Washing

Diversey has proven solutions for every stage of the washing process that help reduce rewashing, linen replacement and machine occupancy, while driving efficiencies and cost controls for operators.

Our extensive portfolio of easy-to-dose laundry products and processes utilise fewer chemicals and energy resources, while delivering exceptional performance including:

- Effective stain removal
- Effective neutralisation of residual alkalinity
- Excellent destainers for all types of fabric, including coloured fabrics
- Superior fabric softening and linen odour neutralising

Kitchen Hygiene

Diversey offers the products and services that protect your customers and your business.

Yes, food safety is about better handling, preparation and storage to prevent foodborne illness. But, as you know, it's more than that. It's about safeguarding the valuable trust of your customers, enhancing your brand, and protecting the foundation of your business. At Diversey, we believe preparation is crucial to prevention. Working with you, we identify the critical hygiene and food safety risks for your operation. And once we fully understand your businesses' unique needs, we have the unmatched expertise to develop the right solution for you, your staff and your business. Our comprehensive portfolio considers all aspects of food safety, offers trusted support programs and helps foster a stronger food safety culture in your business.

Vacuum Cleaners

TASKI® AERO 8/15 Plus

The new TASKI AERO tub vacuum cleaners are highly efficient and use a 585W state-of-the-art vacuum motor, which delivers the same cleaning performance as vacuums with 900W or more. This is achieved through an ingenious airflow system. As a result, the vacuum cleaner saves significant amounts of energy and reduces CO2 emissions without compromising on cleaning results in any way. Thanks to the innovative and patented TASKI whisper technology, the TASKI AERO is extremely quiet. This low noise level means it can be operated in any environment at any time of day or night.

ROBOTIC CLEANING

TASKI®SwingoBot 2000

Cleaning just got easier.

TASKI® Jonmaster™ System

The revolutionary TASKI Jonmaster System from Diversey combines the simplicity of a complete cleaning concept with the effective use of unique microfibres, ergonomically designed equipment and optimised use of daily cleaning chemicals. This combination provides significant operational efficiencies, helps to increase productivity and reduce operating costs to improve your business profitability.

The complete TASKI Jonmaster System is ideally suited for Healthcare sites, Building Service Contractors or sites looking for sustainable solutions who have access to professional laundry services.
