True National Distribution Network

Oates® is an Australian company supplying professional quality cleaning products for the home and industry for over 85 years. With an extensive national warehousing network and experienced sales force, Oates® prides itself on delivering the highest level of quality products with national service. In July 2005, E.D. Oates was acquired by GUD Holdings Limited. As the owner of a number of other iconic Australian companies, including Davey, Dexion, Ryco Filters, Goss, Brown & Watson (Narva & Projecta brands) and Wesfil, GUD Holdings offers Oates® a strong commitment to brand development and to the future growth in professional cleaning & household products across Australia and New Zealand. The Oates® range is currently comprised of over 1500 products with a strong emphasis on continuous improvement, product development and quick and easy, effective cleaning.

QUALITY CONTROL & PRODUCT TESTING

To protect your reputation, Oates® retains testing facilities in Australia and overseas at the point of manufacture.

Our guarantee is your guarantee.

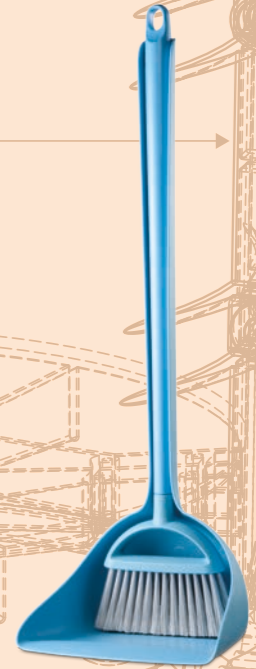

ENGINEERING & INNOVATION

Oates® leading the market for over 85 years with iconic cleaning products.

With a dedicated team of engineers Oates® continues to design and innovate, creating award winning products that Clean Best!

Oates® is Matching Cleaning with Innovation

ENVIRONMENTAL FOCUS

Oates® is working towards a sustainable environment by supporting the need to use recycled materials where possible. We are striving to create products which are ecologically responsible and clean best.

Greentex™ Mop

The story behind the Oates® Greentex™ Mop is one of conservation and care for the environment. The yarn uses renewable energy in the production process and is made entirely from recycled fibres such as pure green PET plastic bottle fibres and post consumer rayon/polyester. The Greentex™ Mop absorbs over 5 times its weight and releases up to 40% upon wringing. It's professional quality from the yarn manufacturers behind DuraClean® mops.

Citrus Resources

The range of Citrus Resources products includes multi-purpose cleaners, disinfectants, dishwashing detergents, hand washes, deodorisers, laundry and fabric care, and other specialty cleaners. The formulations are highly concentrated and biodegradable, developed with an aim to help sustain the environment using natural renewable ingredients.

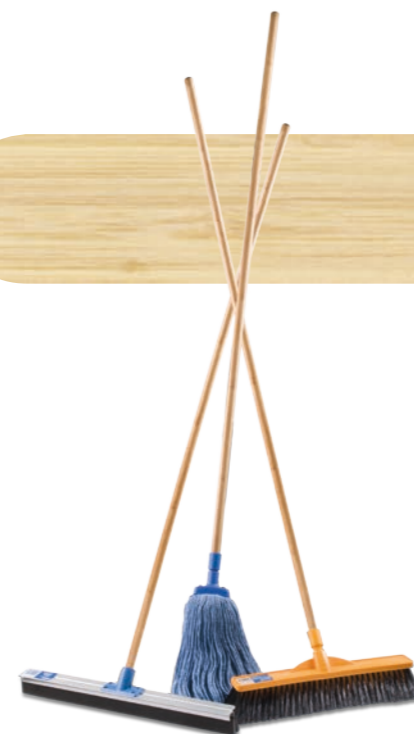

DuraTuff® Handle

Oates® are helping to sustain the environment by using bamboo from renewable resources over timber where possible.

Our DuraTuff® handles are made from 100% Bamboo and are complete with a high quality lacquer finish.

- Mighty tough
- Unique technology
- Manufactured using renewable resources

PRODUCT GUIDE SYMBOLS

Oates® has allocated a number of symbols to help identify prominent attributes and professional endorsements of selected products. These include: Colour Coding, Antibacterial Properties, Designed in Australia and HACCP Certification.

Look out for these symbols throughout this product guide to assist in making quick, yet informed purchase decisions to ensure the products suit the intended application and consumer needs.

THE BENEFIT OF COLOUR CODING

Oates® is committed to developing products that promote workplace safety and cleanliness. As a part of this goal, Oates® offer a complete colour coded product range that helps reduce the risk of cross contamination between different working areas.

Colour coding products help ensure the right product is used to clean the right area to minimise the risk of bacteria transfer between cleaning zones and help improve hygiene levels. Oates® offers an extensive colour coded range of products across many categories including mops, buckets, brooms, small brushware, cloths, wipes, handles and accessories.

This symbol represents any colour-coded Oates® products. These products are designed to reduce the risk of cross contamination between different working areas. See the benefit of colour coding on page 9 of this product guide.

After rigorous internal testing by Oates®, many products in the range are also submitted to a third party for assessment and endorsement of material safety, accuracy and appropriateness in a food application. This is issued by an independent organisation of food safety experts, called HACCP.

HACCP Australia Food Safety Certification provides a recognised endorsement that is an assurance to the industry and provides a guarantee to consumers of a product's suitability for use within a food related environment. Oates® HACCP approved products have been tested and accredited to deliver to following attributes:

- ▶ Well designed with 'food-safe' characteristics
- ▶ Non toxic (or appropriate levels of toxicity)
- ▶ Easy to clean (or appropriate for use)
- ▶ Likely to reduce the risk of any form of contamination
- ▶ Designed for a low consequence of error in use

This symbol represents any Oates® products with antibacterial treatment. These antibacterial properties help to inhibit the growth of germs and odours in the product, enabling it to stay fresher longer.

This symbol represents any Oates® products, which were designed in Australia.

BUCKETS

Oates® strong reputation amongst trade buyers as a reliable supplier of quality products has been reinforced by long-standing market leadership in products like the renowned DuraClean® bucket.

DuraClean® Roller Wringer Buckets

This patented dual action sliding roller wringer technology helped bring ergonomic benefits to the cleaning industry and was one of the first of its kind to take the mop wringing load away from the user. Oates® DuraClean® buckets undergo scrupulous testing in Oates® laboratories to ensure enduring commercial cleaning use.

The DuraClean® bucket holds 15 litres of liquid yet it is lightweight and its non-marking castors make manoeuvrability easy. The durable heavy duty plastic is highly resistant to chemicals, and is hygienic and rustproof. It also features a non-slip foot pedal for a strong grip while wringing and comfort grip handle for easy carrying.

DuraClean® Ultra Roller Wringer Buckets

Everyone knows and loves the iconic DuraClean® Mark II bucket, however once you discover the ultra-performance features of the DuraClean® Ultra Bucket you will never go back!

With a wide mouth opening to suit larger mops, pouring spout, holding grip on base, removable handle clip, ambidextrous foot pedal, full width foot pad and rubber anti-skid floor grip it will prove to be the ultimate mopping companion. Additional benefits include a large 16 litre capacity, HACCP endorsement and 2 year guarantee.

Ergo Buckets & Press Wringers

Press wringer buckets are the advanced system for ergonomically wringing mops. Oates® Ergo Buckets are elevated on castors for easy manoeuvrability and have a long handle to help reduce the risk of back strain. The high handle position improves leverage for a quicker and easier wringing action.

Additional features include a removable dirt trap and drain plug for easy cleaning and a handle clip to fix a mop in place while not in use.

Oates® 9 Litre AA Wringer Mop Bucket received an Australian Design Award. The unique one foot wringing operation helps make mop wringing effortless.

- Collapsible cone wringer requires less force and provides improved wringing performance
- Durable and lightweight with pouring spout for easy transfer of liquids
- **Dimensions:** W375 × D290 × H290mm

GOOD DESIGN Selection

DESIGN FOR A BETTER AUSTRALIA

Good Design Australia is an international design promotion organisation responsible for managing Australia's annual Good Design Awards program.

With a proud heritage dating back to the Industrial Design Council of Australia (IDCA) established in 1958, the Australian Good Design Awards is recognised by the International Council of Societies of Industrial Design (ICSID) as Australia's peak design endorsement program.

The Good Design Awards is Australia's longest standing national design award and promotion program, and one of the few forums for professional Industrial Designers and manufacturers to showcase their design expertise to national and international audiences. As a result of more than 50 years of design benchmarking, the program has focused on progressively raising the standard of design and innovation in Australia.

MOPS

A Mop For Every Application

DuraClean® Mops

Oates® DuraClean® mops are produced using an exclusive textile blend yarn which has been produced for over 100 years and uses a unique tried and tested manufacturing technique. This blend has made the DuraClean® brand a legendary name in the industry and its proven success is considered by Oates® to be a major attribute to the success of the business in the professional cleaning product industry.

The synthetic fibres improve tensile strength and durability while helping to slow down shrinkage, allowing unsurpassed durability and making this mop ideal for all heavy duty commercial cleaning jobs.

The natural fibres enhance the effectiveness of absorbency and enable the mop to go to work immediately without

the 'break-in' period, giving ultimate cleaning performance instantly.

These mops are also colour coded which helps to reduce the risk of cross contamination between different working areas. For additional benefits and further information about colour coded products please see page 9.

Squeeze Mops

Oates® Tilt-a-matic® Squeeze Mop is Australia's number one selling squeeze mop! It is specially designed with a unique patented tilting mechanism that enables you to mop under low objects such as coffee tables, lounge settings and cabinets. It also features a unique replaceable scour dot to help remove stubborn spots.

This mop was specifically engineered to reduce the amount of parts from its previous design. This included the removal of steel parts and instead using polypropylene plastic parts making it more recyclable, lightweight and easier to use. Not only did the change improve the functionality of the mop through increased strength and bending ability, but the robust polypropylene also does not rust and is more durable. Oates®

Tilt-a-matic® squeeze mops undergo rigorous testing in Oates® laboratories to ensure enduring use.

The Oates® Squivel® Mop MK2 sphere head gives easy manoeuvrability around corners. The easy-squeeze mechanism removes more water so the floor can be walked on almost instantly. It also features an extra-large non-scratch scour to remove stubborn marks and easy change sponge to help make cleaning a breeze!

Cotton, Antibacterial, Strip, Microfibre & Blend Mops

Oates® Antibacterial Mops contain antibacterial properties that help inhibit the growth of germs and odours in the mop, enabling it to stay fresher for longer!

Oates® premium blend of natural and synthetic mop yarn is manufactured using a perfect balance of twist in both the single and seven ply form to maximise absorbency and moisture holding ability, allowing floors to dry quickly.

Oates® Contractor™ Mop Heads contain cotton mop yarn that aids in abrasion and chemical resistance. These mops are ideal for use on smooth surfaces such as tiles, linoleum and timber floors.

Oates® Polyester and Cotton Blend Mops are ideal for applying sealers and polish. They are also suitable for use on rough surfaces due to their high lint resistance and durability. The cotton fibres are highly absorbent, and highly resistant to abrasion, harsh chemicals and high temperatures, hence these mops excel in general maintenance, stripping, scrubbing and rinsing applications.

Oates® Microfibre Mops feature 6 ply twist yarn for ultimate absorbency, strength and cleaning power. Microfibre technology captures grease, dirt and dust without streaking and they also include a beaded scour pad for spot cleaning stubborn dirt and grime. They are ideal for use on all smooth indoor surfaces.

Modacrylic Dust Control Mops

Modacrylic mop fibres are strong, resilient, and dimensionally stable meaning they have good press and shape retention, making them highly durable and perfect for commercial use.

These mops have outstanding resistance to damage from most chemicals, solvents, moths and mildew, and they are non-allergenic. Modacrylic mops also have high resistance to abrasion and are therefore great for use on rough surfaces.

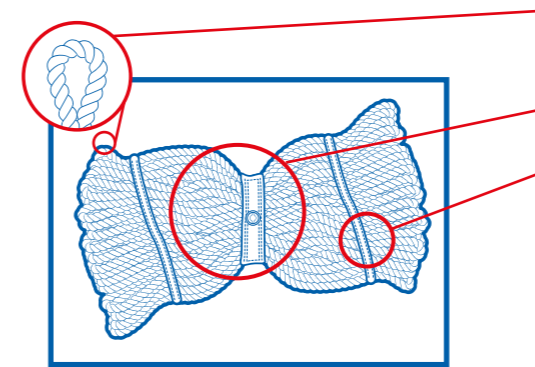

The fabric is soft and gentle on delicate surfaces making Modacrylic mops popular for use on timber floors. The low density of this fibre means these mops are lightweight and easy to use and are the preferred choice for many industrial cleaners for mopping large areas as they can have a very wide head yet are still easy to manoeuvre and are therefore highly ergonomic.

Modacrylic mops are easy to maintain and can be machine washed using warm water (up to 40 degrees Celsius) and tumble dried at a low setting.

Microfibre Flat Mops

Due to industry feedback and the ever increasing trend towards flat mopping, Oates® has expanded the range of flat mops and pads even further, and are proud to offer a flat mopping solution to suit every need! Flat mops use microfibre technology composed of thousands of tiny fibres made from woven threads that are 1/100th the size of a human hair, acting like tiny hooks they absorb dirt and moisture, locking it away. Dust, dirt and direct particles bond to the microfibres and are not released until the pad is washed in water; thus they are not pushed around or transferred from surface to surface while cleaning. No chemical solutions are necessary making microfibre products ideal for allergy and asthma sufferers as well as anyone with multiple chemical sensitivities. The microfibres are also gentle enough to use on sealed timber floors providing a clean, shiny finish. Oates® microfibre flat mops can be used wet or dry. Dry mopping is ideal for collecting dust, dirt, hair and fine particles. Wet mopping effectively removes grease and tracked in grime.

- Loop end yarn minimizes the likelihood of the mop tangling and linting.
- A butterfly cut mop gives extra floor coverage.
- Angled tail banding allows for easier wringing as it prevents the fibres getting caught up in the rollers of the bucket.
- It is important to take care when washing your mop to keep it in top condition and maximize cleaning performance. The use of fabric softener in the washing process is not recommended, particularly on modacrylic and microfibre mops as it may damage the fibres.

Greentex™ Mops

Oates® recognises and supports the need to use recycled materials where possible in an effort to work towards a sustainable environment. Greentex™ mop yarn is manufactured by the same yarn producer as the HIGHLY successful Oates® 'DuraClean®' mop yarn. Greentex™ mop yarn is made from recycled fibres, including PET plastic bottle fibres and post-consumer rayon/polyester. The Greentex™ Mop is a strong performer, absorbing over 5 times its weight and releasing up to 40% upon wringing. It will be

approximately 90% dry after the washer spin cycle and completely dry after 15 minutes of light dryer time, or 100% air-dry overnight. As one of the leaders in the industry it is important that Oates® not only lead with the most effective cleaning products but also with the very latest technology in cleaning, and where possible products that are ecologically responsible. At the time of release the Greentex™ mop was the first of its kind released to the Australian market.

Value Mops & Handles

Oates® is always looking to deliver VALUE so we offer a general range of colour coded commercial mops and handles. This range offers good quality commercial standard products for those on a budget. The mop yarn is highly absorbent, long lasting and has HACCP approval for those needing to mop within areas where incidental food contact may occur. For further information on HACCP and the additional benefits of colour coding please see page 8 & 9.

Handle Selection

For wet mopping Oates® recommend aluminium handles over the alternatives of powder coated steel or timber handles. Aluminium is lightweight, strong and will not rust over time when in constant contact with water. Timber handles cannot be HACCP approved as the bacteria can live within the natural fibres and they cannot be sanitized to the required standards. Handle size is another very important consideration to ensure that comfort and safety is maximised whilst mopping. The end user should always select a handle appropriate to their height. In general, a 1.35m handle should be suitable for a person up to 6 feet tall. A person 6 feet tall or more may benefit from using a 1.50m handle. This will help to reduce back strain while mopping. For heavy duty commercial jobs always use a handle with a 25mm external diameter. The internal wall thickness of the aluminium must also be adequate to ensure maximum strength and longevity. Use these handy tips as a general guide to maximise your mopping experience.

Squeeze mops & refills

Squeeze Mops

Tilt-a-matic® Squeeze Mop

Code	Outer Pack	APN
MS-015	4	9310124111232

- Unique tilt mechanism for mopping under low objects
- Scour dot removes tough dirt
- Highly absorbent sponge
- 22mm powder coated steel handle
- **Dimensions:** W230 × D125 × H1325mm

Unique tilt mechanism for mopping under low objects

Squeeze Mop Two Post

Code	Outer Pack	APN
MS-001	6	9310124111201

- Easy wring handle lever
- Highly absorbent sponge
- 22mm powder coated steel handle
- **Dimensions:** W230 × D100 × H1270mm

Sqwivel™ Squeeze Mop

Code	Outer Pack	APN
MS-020	4	9310124111423

- Unique rotating sphere enables mop to swivel and glide over floors
- Heavy duty wringing mechanism
- Angled mop head for getting into tight spots
- 22mm powder coated steel handle
- **Dimensions:** W250 × D110 × H1325mm

Massive Four Post Squeeze Mop

Code	Outer Pack	APN
MS-100	4	9310124700696

- Extra thick sponge for greater absorbency
- Wider sponge for greater floor coverage
- Extra long scour for removing stubborn marks
- 22mm powder coated steel handle
- **Dimensions:** W300 × D100 × H1375mm

Designer Squeeze Mop

Code	Outer Pack	APN
BM-750CLR	6	9310706007502

- Easy change refill - simply unscrew handle to replace
- Lightweight and easy to use
- Highly absorbent sponge
- 22mm powder coated steel handle
- **Dimensions:** W232 × D80 × H1440mm

Squeeze Mop Refills

Squeeze Mop Two Post Refill

Code	Outer Pack	APN
MS-002	6	9310124111218

- Highly absorbent and long lasting sponge
- Fits new and previous Oates® Two Post Squeeze Mop series
- **Dimensions:** W230 × D90 × H25mm

Designer Squeeze Mop Refill

Code	Outer Pack	APN
BM-751	6	9415877075180

- Easy change refill
- Highly absorbent and long lasting sponge
- Fits Oates® Designer Squeeze Mop (BM-750CLR)
- **Dimensions:** W232 × D93 × H43mm

Multi-Fit Squeeze Mop Refill

Code	Outer Pack	APN
MS-005	6	9310124111225

- Highly absorbent and long lasting sponge
- Fits most Two and Four Post Squeeze Mop brands
- **Dimensions:** W225 × D95 × H25mm

Multi-Fit Squeeze Mop Refill - 2 Pack

Code	Outer Pack	APN
MS-006	6	9310124111607

- Highly absorbent and long lasting sponge
- Fits most Two and Four Post Squeeze Mop brands
- 2 pack value
- **Dimensions:** W225 × D95 × H25mm

Tilt-a-matic® Squeeze Mop Refill

Code	Outer Pack	APN
MS-017	6	9310124111614

- Highly absorbent and long lasting sponge
- Fits new and previous Oates® Two Post Squeeze Mop models
- Includes scour pad refill
- 2 pack value
- **Dimensions:** W226 × D95 × H25mm

Sqwivel® MK2 Squeeze Mop Refill

Code	Outer Pack	APN
MS-024	6	9310124704342

- Highly absorbent sponge
- Unique angle for getting into tight spots
- Super easy sponge replacement
- Includes scour pad refill
- Fits Oates® Sqwivel® MK2 Squeeze Mop
- **Dimensions:** W250 × D110 × H50mm

Massive Four Post Squeeze Mop Refill

Code	Outer Pack	APN
MS-101	4	9310124700788

- Wide sponge for greater floor coverage
- Extra thick sponge for greater absorbency
- Long lasting
- Fits Oates® Massive Four Post Squeeze Mop (MS-100)
- **Dimensions:** W300 × D85 × H30mm

Cone/strip mops & refills

Cone Wringer Mop and Refills

Ezy Squeeze® Antibacterial Cone Wringing Mop

Code	Outer Pack	APN
MH-ES-01	6	9310124111188

- Wringer cone with sculpted ridges designed for thorough wringing
- Antibacterial properties help inhibit the growth of germs and odours in mop
- Lightweight and easy to use
- 22mm powder coated steel handle
- **Dimensions:** 190mm yarn length

Ezy Squeeze® Antibacterial Cone Wringing Mop Refill

Code	Outer Pack	APN
MH-ES-02	6	9310124111300

- Antibacterial properties help inhibit the growth of germs and odours in the mop
- Premium cotton and synthetic mop yarn blend for a thorough clean
- **Dimensions:** 190mm yarn length

Ezy Squeeze® Ultra Mop

DECITEX

OATES® WATER-FED FLAT MOP SYSTEM 4 IN 1 – SWEEP, CLEAN, ABSORB, DRY

Oates® by Decitex Fluid Flat Mop System

The Oates® by Decitex system provides users with the ultimate floor maintenance solution. In 2011 Oates® partnered itself with French company Decitex bringing you the Oates® by DECITEX - Fluid Flat Mop System.

Since the initial stage 1 release, the range has grown in size and popularity. It is now the one-stop shop for those who desire a premium flat mopping solution with maximum cleaning performance.

The revolutionary system holds liquid within the handle that can be dispensed via the ergonomic trigger located at the top of the handle. The Fluid Flat Mop System comprises an aluminium Fluid Flat Mop handle and choice of 300, 400 or 550mm heads combined with a vast selection of colour coded pad types to suit a multitude of applications. Main focus areas include general mopping and spill removal right through to disposable pads for high risk areas, such as operating theatres and tightly controlled pharmaceutical industry environments.

DECITEX is a company at the heart of textile innovation and development, designing a wide variety of microfibre textiles for professional use. As a manufacturer, DECITEX delivers high performance textiles for mops and wipes that are easy and intuitive to use. DECITEX complements its textile expertise with a lightweight, innovative range of handles, pads, mop heads and wipes. With their original design, DECITEX products allow textiles to become the prime cleaning agent, reducing our reliance on chemicals.

The Oates® / DECITEX partnership was developed to provide customers with a comprehensive range of premium quality Fluid Flat Mop System products that make cleaning quick, easy and effective. Refer to pages 40 – 45 for more comprehensive details.

- Electrostatic properties attract and trap dirt for a thorough clean
- Gentle on furnishings and delicate surfaces
- Ergonomic soft grip handle
- Dimensions:** W80 × D80 × H490mm

DUSTERS

Microfibre Wand Dusters

Oates® develop products that help make the chore of cleaning easy and effortless. And our range of microfibre dust wands are a perfect example of that!

Simply bend into position to clean hard-to-reach places such as blinds, shelves, under fridges, ceilings, fans, window sills and delicate surfaces. An extension handle can be added to allow alternation between hand-held dusting and long reach dusting of high ceilings and cornices.

An added benefit of microfibre dusting is that no chemical solutions are necessary making it ideal for allergy and asthma sufferers as well as anyone with multiple chemical sensitivities. Microfibre is gentle on furniture, mirrors,

windows, porcelain, pots and cars. As the fibre is extremely fine, there is less chance of scratches, mist or marks being left on the surface. The microfibre pad attracts and collects dust, dirt, hair and fine particles. Be sure to check out the Oates® Wizard Duster with unique microfibre fringe that attracts and traps dust, dirt and grime.

Feather Dusters

Oates® also feature a range of hand crafted feather dusters which are made from real ostrich feathers and are therefore soft enough for even the most delicate surfaces. The Ostrich feather is unique in its durability, softness and flexibility. The configuration of the feathers helps create a static charge when rubbed against a surface that attracts and holds dust which can then be shaken out or washed off. Because of its similar makeup to human hair, care of the ostrich feather requires only an occasional wash with mild detergent and and then it can be air dried.

The **Wizard Duster™** with its unique microfibre fringe attracts and traps dust, dirt and grime, and minimises airborne dust. With a flexible head to clean those hard-to-reach places, it is ideal for dusting glass, timber furnishings and ceramic in the home and office.

Feather & wool dusters

Feather Dusters

Feather Duster - Medium

Code	Outer Pack	APN
B-21001	5	9310706210018

- Assorted colours randomly packed
- 75cm extension handle to clean hard-to-reach places
- **Dimensions:** W80 × D45 × H790 to 1060mm

WIPES, CLOTHS, SPONGES AND SCOURS

Oates® wipes and cloths are available in several different material compositions for specific applications.

Wipes & Cloths

The popularity of microfibre cloths has been on the rise for a number of years and has revolutionised the way we clean.

Oates® microfibre cloths feature technology involving thousands of tiny woven threads that are 1/100th the size of a human hair. Each thread acts like a tiny hook that absorbs dirt and moisture, locking it away. Dust, dirt and direct particles are bonded to the microfibre cloth and not released until the cloth is washed in water; thus they are not pushed around or transferred from surface to surface while cleaning. The dense structure and thick gsm of Oates® DuraClean® wipes give them the strength for heavy duty day-to-day cleaning. Available in tear-off rolls or ready-to-use sheets for ultimate convenience. These wipes are highly absorbent and effectively remove oil, ink and other fluids with ease. They are also highly solvent resistant and super strong for both wet and dry cleaning and can be washed and reused if desired.

Sponges & Scours

Oates® prides itself on being a trusted Australian brand in the supply of sponge and scour products since 1931. With long standing technology and experience, Oates® sponge and scour products remain some of the most popular and best-selling in the market. Oates® DuraFresh® and Industrial grade scours are made with a three dimensional construction that ultimately allows for greater structural strength of the pad and maximum dispersion of scouring abilities, providing a premium scour pad that lasts longer.

Many of the Oates® DuraFresh® products contain antibacterial treatment. These properties inhibit the reproduction and growth of bacteria, fungi and other destructive micro-organisms helping to reduce the growth of germs and odours. This antibacterial formula remains active for some time promoting freshness and helping extend the product life by attacking the problem source. This promotes hygiene and eliminates odour causing germs rather than masking them with a fragrance.

Eager Beaver Pads & Tools

Manufactured by a world class international supplier in this field, Oates® renowned Eager Beaver pads are ideal for multiple scrubbing jobs in the commercial market and are colour coded for easy application selection. The white non-abrasive polishing pad provides a high gloss finish, the red scour pad is ideal for light duty scrubbing and the black scour pad is the perfect choice for heavy duty scrubbing for removal of heavy wax and grime build up.

Ultimate Scrub Tuff Sponge

Oates® range of Ultimate Scrub DuraFresh® Tuff Sponges provide you with Super Cleaning Power! These high performance cleaning sponges remove ink, crayons, scuff marks and texta off walls, hard floors, windows and multiple solid surfaces. They also eliminate the need for chemical cleaning agents - simply wet the sponge, squeeze out the excess water and it is ready for use. The secret is in the superfine fibres which have the ability to trap and lift stubborn grime such as smoke stains, water marks and even mould! The large size is ideal for big jobs where heavy duty stains are encountered. They can also be cut into smaller pieces to suit smaller cleaning jobs.

Put **BAMBOO** to work in your kitchen and enjoy the results

Bamboo cleaning products from Oates® are the natural way to clean up your kitchen.

WIPES, CLOTHS, SPONGES AND SCOURERS

FLOOR PADS

Quality and experience
working together

Oates® provides the ultimate floor maintenance solution by utilising its existing wide range of cleaning products, in combination with the Oates® Americo Floormaster pads and Research Products floor sealers and detergents.

Americo is an internationally renowned manufacturer of floor pads with its principle manufacturing facility and administrative offices located in Georgia, USA. They pride themselves on producing quality products manufactured to rigorous standards, backed with fast and dependable service.

Oates® long standing partnership with Americo provides a total floor care solution with comprehensive product range and outstanding support.

Did you know?

100% recycled fibre is used in the production of all of the floor and utility pads. All of the synthetic polyester fibres used in the products come from both post consumer and post industrial recycled water and carbonated drink bottles.

All binders used in the manufacturing process are water based latex resins. No phenol-formaldehyde resins are used.

Floor Pads

Regular speed polyester non-abrasive floor pads are ideal for mirror finishes while medium abrasive pads are great for buffing and light polishing, scrubbing and light duty stripping.

The range of ultra high speed synthetic and natural blend pads are perfect for buffing medium to hard surfaces, improving stability, and reducing drag to enhance gloss restoring. They are also ideal for removing scuff marks and for use in high traffic areas. Ultra high performance pads can be used for tough jobs where more aggressive stripping and increased efficiency are required. Lambs wool buffing gives a prestige finishing touch to the floor presentation.

A total floor care solution

Oates® continues to research new and innovative ways to improve products and provide cleaning solutions to the market. Research Products and Citrus Resources products in combination with the Oates® range of cleaning equipment including mops, floor pads, buckets and cloths provides a complete cleaning solution system for commercial cleaners throughout Australia.

Since its establishment in 1982, Research Products has been recognised as an innovator in the supply of hard floor and carpet cleaning solutions. These products are highly concentrated, making them very economical and helping to reduce freight and inventory.

In 1992 a new concept of NATURAL highly biodegradable cleaning products for commercial use was introduced, called Citrus Resources. These products, many of which are approved by Good Environmental Choice Australia, help to sustain the environment and are safer to use, yet they are powerful enough for commercial use.

A comprehensive range of popular and proven products, coupled with exceptional customer service and an outstanding nationwide network of sales and logistics, it's not hard to see, that when it comes to cleaning, Oates® really is the professionals choice that cleans best.

CORDLESS

Super portable, you can use it anywhere; stairs, swimming pools and motor vehicles. It's ideal for all hard to reach areas.

4 HOURS RUNTIME

A real workhorse with an impressive 4 hours runtime from one charge. Taking only 8 hours to fully re-charge.

LIGHTWEIGHT

Weighing only 2kg (4.5kg with the harness) it is extremely lightweight to use, yet heavy duty in its construction.

100% WATERPROOF*

The MotorScrubber is 100% waterproof and submersible in water with no shock risk due to its extra low safe voltage.

EFFECTIVE CLEANING

The reliable high torque motor allows for fantastic washing, polishing and cleaning results up to 4 metres high.

UK MANUFACTURED

Using the highest quality, durable components every MotorScrubber is proudly manufactured in the UK.

JANITORIAL AND SAFETY

In recent years Oates® has led the market with world class innovation improving the cart range to expand functionality giving end users more choice in selecting the most suitable cart for the task at hand.

Platinum Janitors Cart MKII

The tremendously popular Oates® Platinum Janitors Cart released in 2013 has been upgraded making the MKII version better than ever! Originally designed from the ground up after extensive consultation with end users and highly esteemed design professionals it is now compatible with the all new optional extras: security hood kit and security door kit. Existing classic optional extras include locking compartment, optimum manoeuvrability and the ability to secure multiple accessories such as handled products, buckets and caution signs, along with a folding rear handle, and lower platform facilitating compact storage. The Oates® Platinum range of carts are compact and fit easily into most elevators, passageways and tight spots. They are lightweight, sturdy, quick and easy to assemble. Oates® remains committed to leading the way in relevant, functional design and growing Occupational Health and Safety requirements.

The one stop shop for all things related to Janitorial and Safety!

Compact Flat Mop Trolley MKII

The Oates® Compact Flat Mop Trolley MKII has been designed as the ideal flat mopping companion facilitating efficient completion of otherwise difficult mopping tasks. With its modular design for customisation based on user preference, it's a lightweight, practical mopping solution to ensure the job gets done quick and easy, every time. Additional high performance features can be viewed on page 80.

Patented A Frame Signs

The Oates® Non-Slip A Frame Caution Signs were developed in accordance with feedback from the end user. They have unique patented rubber bumpers on all corners to prevent the sign sliding if stepped upon when laid flat on the floor, helping to prevent workplace injuries to staff and the general public. The lightweight, compact folding design allows for convenient storage on carts and easy transportation between work areas. They are also available in multiple fluorescent colours for added visibility.

Oates® remain committed to exploring new ways and developing more products that increase health and safety in the work place!

Janitorial Carts

- Dimensions:** W160 × D30 × H1000mm

Nippers Tips (Pair)

Code	Outer Pack	APN
NIP-075	1000	9310124411400

- Replacement rubber tips provide grip when collecting objects
- For use with NIP-070 and NIP-100
- Dimensions:** W142 × D92 × H217mm

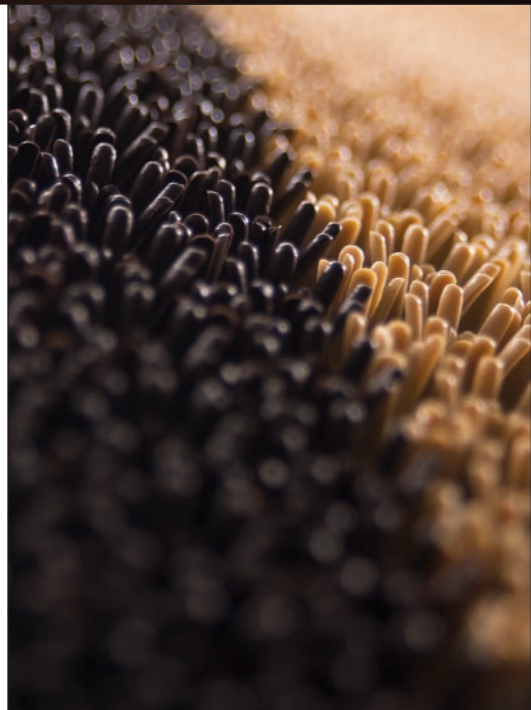

MATS

Mats

Oates® unique Grit Guard® Mats have an open back design to help eliminate build up of dirt within the mat, making them easy to clean by simply shaking or hosing off any loose particles. The heavy duty plastic is highly resistant to most industrial chemicals and oils, grease and weathering, making the mats durable and long lasting.

These mats feature large holes to help facilitate drainage of industrial chemicals and debris in commercial factories and warehouses. They also feature moulded air pockets to provide buoyancy for cushioning under foot and the unique 'pin' like bristle design helps remove dirt from footwear.

Carpet mats

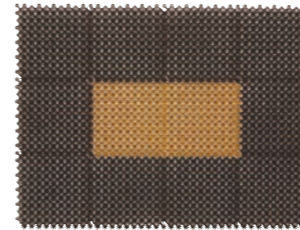

Oates® range of durable coarse fibre carpet mats are your first choice for effective dirt removal in high foot traffic areas. The ribbed surface traps dirt and water, while the slip resistant rubber base ensures the mat stays in position. Manufactured from high quality, quick drying synthetic fibres to ensure ongoing maximum performance they are available in small, medium and large size mats.

Did you know?

To keep dirt out of your building effectively, install a five metre mat. After walking five metres, 90% of dirt and debris will have been removed from the bottom of people's shoes. This helps reduce damage to floors and also lengthens the life of your carpets.

Grit Guard® Synthetic Mats - Open Back Design

Grit Guard® Mat Small - Mixed Colours

Code	Outer Pack	APN
MAT-001	6	9310124480017

- Open back design helps eliminate build up of dirt making mat easy to clean
- Unique 'pin' like bristle design helps remove dirt from footwear
- Mat can be joined together to make larger mats
- Each outer pack contains 2 × heritage green with beige window, 2 × heritage green with maroon window, 2 × dark brown with beige window

- Coarse fibres help remove dirt and debris from footwear
- Quick drying fibres and backing
- Dimension:** W1500 × D900 × H7mm

FLOOR SQUEEGEES

Floor squeegees

Oates® squeegees can be used to push or pull liquids. The flexible EVA floor squeegees allow for cleaning of uneven surfaces, such as tiles, getting right into grooves and lower grout areas. This expedites drying time, leaving floors hygienically clean.

Our red rubber squeegees are extremely durable and grease resistant. Available in both timber back and rust resistant aluminium frame options these are ideal for use on large concrete surfaces.

Did you know?

Floors in most wet areas are not flat; they are designed to allow water to run downhill towards a drain or outlet. To move liquid effectively you need a squeegee that will mould to the shape of the floor and get into lower areas of grout.

Red Rubber Squeegees & Refills - Aluminium Back

450mm Aluminium Back Squeegee - Red Rubber

Code	Outer Pack	APN
B-13111	20	9310706131115

WINDOW WASHERS

Oates® are proud to offer the ultimate cleaning solution with the expanded Moerman® by Oates® professional window cleaning range

Moerman® by Oates® Window Washers

Moerman® has been in business since 1885 and considered a world leader in floor squeegee production. In addition to this they have also been producing a highly acclaimed window cleaning range for many years.

Through extensive market research and end user focus groups Moerman® have reconfirmed which tools and features are essential for professional users. These tools are all about durability, design, performance, ergonomics and quality materials.

Oates® partnership with Moerman® aims to provide customers with a comprehensive range of professional window cleaning products, combined with nationwide service and support.

For the DIY home user the Oates® by Moerman® household range is also available for users who demand a professional quality range designed for home cleaning.

Moerman® Liquidator

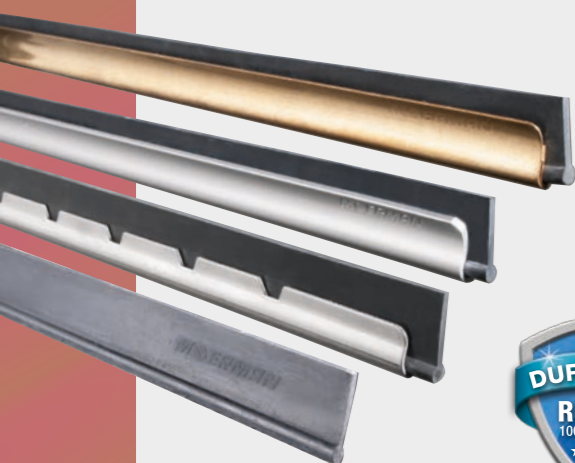

Edge-to-edge cleaning reduces cloth detailing!

- Dura-Flex® rubber is supported all the way to the plastic tips
- Significantly reduces cloth prepping and detailing
- High grade moulded plastic ensures no damage to window frames
- No water residue left in corners.

Dura-Flex™ Rubbers

Years of research and development in rubber compounding has allowed Moerman® to create a unique, superior, window cleaning rubber for the professional user called Dura-Flex™ rubber. Blind and comparative tests with hundreds of professional window cleaners have shown that Moerman's natural rubber is considered one of the best in the market.

Moerman® Combinator

Wash & Dry in 1 stroke

- Choose your configuration of the combinator T-Bar to either a "one-pass" or a "wash-flip-squeegee"
- Lock and click-on parts makes adjusting configurations quick and easy
- Lightweight for easy handling

AUTO CARE

Auto Care

The Oates® automotive cleaning range includes premium sponges, cloths and chamois, including the well known and market leading Enka-Fill PVA Chamois. These chamois are highly resistant to bacteria breakdown and highly absorbent making them a durable and extremely effective cleaning cloth.

The precise combination of materials and technologies that make up this Polyvinyl Alcohol cloth are exclusive to Oates® and have been for over 40 years. These cloths have been consistently rated by multiple car magazines as the number one chamois in the marketplace.

Oates® Enka-Fill PVA Chamois slide smoothly over glass, leaving it streak free. They are not only great for automobile cleaning but also leave windows and mirrors squeaky clean and streak free and are ideal for use in bathrooms and boats.

Did you know?

For best results always store the Enka-fill PVA Chamois moist and in its container out of direct sunlight. This will maximise the lifespan of the cloth and it will be ready to use at any time!

BINS, STORAGE AND TACKERS

Stackable Drawers

Oates® can help keep your home not only clean but tidy too with a range of storage and organiser products that are lightweight, stackable, and easy to move from one room to another.

Oates® Stackable Drawers are manufactured using heavy duty plastic and are available in a range of shapes and sizes. They are ideal for storing; toys, books, clothes, shoes, herbs, buttons, sewing kits, CDs, cleaning products and more!

Bins

Oates® has a large range of bins to suit every application; from indoor pedal bins to external garbage and galvanized bins. Our bins come in various shapes and capacities to suit offices, factories, workshops, hospitality and of course Australian homes.

Did you know?

Oates® now offers a wide range of coloured wheelie bins in 120L and 240L capacities as well as 4 wheeled bins in 660L and 1100L capacities. They are manufactured in Australia from UV stabilised HDPE material to withstand harsh conditions and are certified to AS4123. Custom colour combinations are also available upon request for bulk purchases.

- Metal iron stand with heat resistant silicone grips to rest iron on safely during use
- Durable 100% cotton cover with elastic drawstring for easy fit
- Soft foam underlay for ultimate steaming performance and enhanced crease removal
- **Dimensions:** W330 × L813 × H160mm

IRONING BOARDS

Ironing Boards

Welcome to the Oates® ironing board range that will help have your clothes crisp and ready to wear in no time.

Oates® ironing boards are available in numerous sizes with many handy features to suit different needs. We also offer bench/tabletop board options for those with minimal storage space.

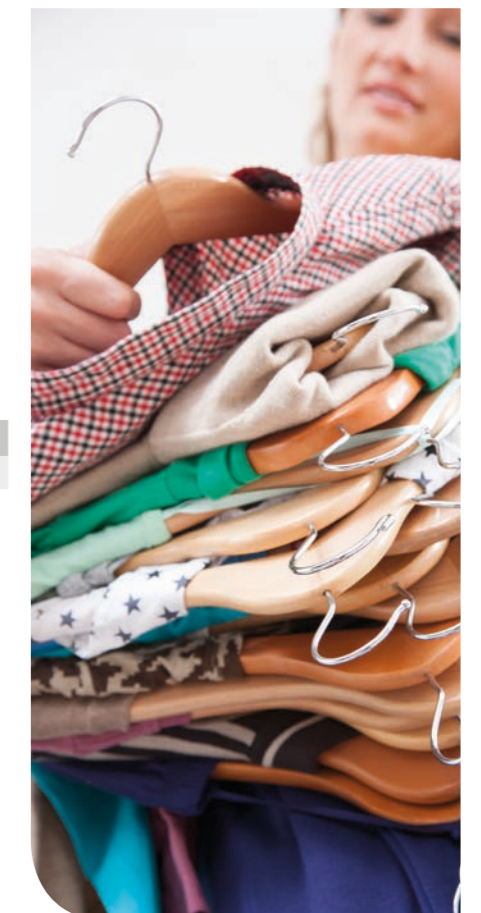

Key features include: large release levers to easily adjust the board height, heat resistant silicone pad to safely rest an iron, removable cotton covers and metallic finishes.

As you can see all the bases are covered with the Oates® ironing board range that's fit for a king!

Did you know?

An open weave mesh base helps to dissipate heat and steam more evenly resulting in enhanced crease removal!

Cookware Accessories

COOKWARE ACCESSORIES AND GLOVES

Gloves

Oates® durable work and garden gloves are specifically designed for comfort and protection for multiple jobs, from roughened latex rubber coated gloves for maximum grip, to high quality leather gloves for heavy duty tasks that require high levels of protection. Oates® plastic dipped and rubber gloves provide resistance to most household cleaners.

Cookware Accessories

Oates® cookware accessories consist of layers of heavy grade 100% cotton, woven fibres and are therefore suitable for use in heavy duty industrial applications. They are available in several varieties of pot holders, tray holders and oven mitts in various sizes. These cookware accessories are HACCP approved and designed to help protect hands, wrists and arms from direct contact with ovens, stoves and hot objects as they provide substantial insulation and protection against heat.

SMALL BRUSHWARE, SCRUBS, SANITARY, DUSTPANS AND BRUSHES

Did you know?

Brazing brushes that have a plastic handle are impervious to most oils, thinners and brake fluids making them excellent for use in mechanical workshops.

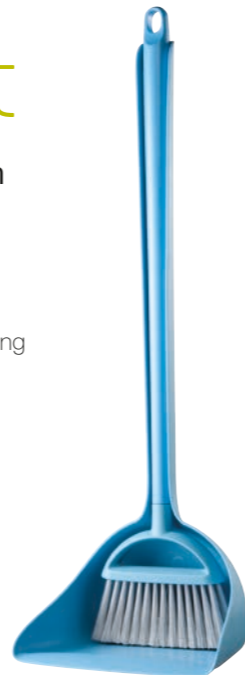

Ezy Reach Dustpan Set

Oates® Ezy Reach Dustpan Set is best described as a cross between a dustpan and a lobby pan set.

This unique design has cleverly fused the benefits of both products delivering an essential household item that cleans quickly, easily and effectively. It is particularly suited to the elderly population where crouching or kneeling to quickly clean up crumbs or dust is eliminated. Taking crouching out of the cleaning process also makes this task quicker for all users,

regardless of age or physical condition. The handle has been ergonomically designed making it super easy to grip, and its space efficient design allows for it to be conveniently packed away in most storage areas. The unit is also freestanding and it can be placed on the floor with confidence, without tipping over.

Brazing Brushes

Oates® Brazing Brushes are used to professionally remove scales, chips, dirt, burns, paint and rust. They are used as a preparation tool for welding, soldering or brazing. Oates® is recognised for using only the finest wire materials to ensure flawless results are achieved and that the bristles are kept firmly in place.

Oates® Steel Wire Brushes are hard wearing, offering a highly durable cutting action. They are also most appropriate for work on steel and iron work pieces.

Stainless steel wire brushes are suitable for work on stainless steel and aluminium fabricated products and for

use on areas that come in contact with food and in higher heat, moisture or humidity situations such as on oven conveyors and barbecues.

Brass wire brushes are softer and offer a brush action that will not scratch harder metals. Brass wire will not generate sparks when used against another metallic surface and are therefore suitable for hazardous areas such as machines where sparks may pose a risk of explosion. Applications for brass wire brushes include cleaning plastic extrusion parts, moulds, print dies and extruded barrels.

Scrubs

Oates® scrubs have strong bristles, tough enough to use on grout, timber decking, slate and terracotta. They remove baked-on grime, grease, wax, rust and corrosion. Oates® selects bristles from the highest quality fibres to ensure they are long lasting and highly resistant to most household chemicals. Many of the Oates® scrubs feature a front scraper to remove even the most stubborn built up marks and grime.

Space Saver Dustpan Set

Oates® Space Saver Dustpan Set was engineered in Australia and features a distinctive freestanding design that saves valuable cupboard space. The brush also features a built-in rubber blade and flagged bristles to ensure effective dust collection is achieved with every sweep! Electrostatic properties in rubber edges on the pan also attract and trap additional dust. The larger size pan is perfect for big areas and the side ridges effectively clean the brush after use.

BROOMS AND HANDLES

Catch All™ Broom

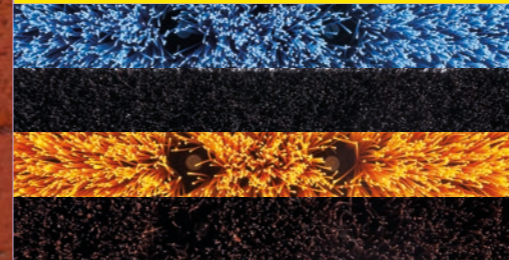

Winner of the best consumer product design at the 2010 Melbourne Design Awards the Oates® Catch All™ Broom effectively cleans hard-to-reach places such as between cabinets and beside the fridge.

Its angled bristles make cleaning skirting boards a breeze while the on-board slimline dustpan and brush save you time and facilitate easy storage!

The soft, flagged Catch All™ broom bristles are ideal for indoor use on various smooth surfaces including tiles, timber floors and vinyl ensuring all fine dust particles are captured with every sweep!

Did you know?

Titanium Brooms

The Titanium Broom Range is a new addition to the Oates® professional outdoor broom range. The brooms are designed for the toughest jobs. The broom head is reversible which makes the broom last as twice as long compared to other brooms. There is a scraper in-built to the broom head for removal of stubborn material. It also comes with a steel brace to provide extra support while sweeping. These combined features make the Oates® Titanium brooms the new standard in outdoor brooms.

Did you know?

- 1 Flagged bristles help trap dirt
- 2 Soft dense bristles give a thorough sweep and are ideal for sweeping fine particles and dust.
- 3 Stiff bristles effectively sweep up large particles.
- 4 Dense blend of natural and synthetic bristles help minimise airborne dust and are ideal for workshops and garages.

Plastic Backed Platform Brooms

Oates® industrial brooms have various combinations of bristle thickness and strength specifically formulated to suit multiple commercial applications.

Medium stiff bristles effectively collect small and medium size particles, and are ideal for pathways and workshop floors.

Hard wearing, extra stiff bristles effectively collect large, heavy debris and are ideal for use on rough concrete, brick paving and bitumen.

A blend of natural and synthetic bristles collect fine particles and minimise airborne dust while sweeping, and are ideal for workshops, factory floors and industrial sites.

Millet & Cobweb Brooms

Oates® Cobweb Brooms have flagged bristles that trap dirt and extension handles to reach high areas. Some also feature contour shape heads that can be flexed into position to clean hard-to-reach places. They are perfect for cleaning the top and bottom of ceiling fans and remove cobwebs and dust from cornices and vents. With a black and green coloured outdoor version also available, Oates® have all your cobweb cleaning needs covered!

Oates® also have a full range of traditional style millet blend brooms available in 3, 5, 7 & 8 tie sizes to cover all outdoor spaces. They contain premium quality natural fibres that collect fine dirt and dust. For heavy duty outdoor sweeping of large areas the 8 Tie Millet Blend Broom complete with durable 25mm powder coated steel handle is ideal.

Timber Backed Platform Brooms

Natural fibre bassine bristles effectively collect small and large particles, and are ideal for use on pavers, cement and hot bitumen.

The unique blend of natural coco, java and synthetic bristles effectively collect fine dust and small particles.

A natural blend of hair and synthetic bristles minimises airborne dust while sweeping. These brooms are ideal for use on floors with a smooth finish and in factories.

Oates® platform brooms are specially crafted from timber produced in accordance with and certified by

the Forest Stewardship Council (FSC). This shows compliance of the highest social and environmental standards in the market.

FSC is an independent, non-governmental, not for profit organisation established to promote the responsible management of the world's forests. Products carrying the FSC label are independently certified to assure consumers they are sourced from forests managed to meet the social, economic and ecological needs of present and future generations.

SACHET MAGIC

Water-soluble sachets contains pre-dosed concentrated cleaning products for great cleanliness and performance.

Sachet Magic

Sachet Magic is an eco-friendly and easy to use range of pre-dosed concentrated cleaning products encapsulated in fully water-soluble sachets.

The Sachet Magic range covers the daily cleaning needs for today's demanding professional. Saving money, time and waste without compromising on high standards of cleanliness and performance.

Features

Time saving and easy to use

- 1 sachet = 1 dose
- No need to calculate dilution rates
- Screen printed dispenser bottles avoid cross contamination
- Staff can easily carry refill stock to increase productivity

Safety

- Training is made quicker and easier
- No more pouring chemicals
- No risk of splash back when decanting
- No direct contact with cleaning concentrates

Eco Friendly & Cost Effective

- All products are 100% biodegradable and phosphate free
- Portion control avoids overuse and streamlines costs
- Concentrated sachets minimise packaging and reduce freight costs
- Less packaging equates to less waste into landfill and reduced disposal costs
- Less storage space required

Reduce the transportation, storage and waste costs

Pre-dosed concentrated cleaning products

Sachet magic

Autoscrubbing

Sachet Magic Autoscrub HD Cleaner - 150PK

Code	Outer Pack	APN
OSM-001	8	9324828004233

- A powerful low foam detergent
- Ideal for all types of autoscrubber machines
- Heavy duty cleaner for cutting grease and grime in one pass
- Fragrance free – ideal for kitchens and food preparation areas
- **Dimensions:** W200 × D198mm × H203mm

- **Dimensions:**
W85 × D49mm × H134mm (OSM-404)
W81 × D81mm × H248mm (OSM-404-BTR)

Handle Matrix

Are you using the right handle for your cleaning tool?

There are many different handles on offer within the Oates® product range. Each of them has been designed to match certain products to cover various applications. We have developed the following Handle Matrix to make it easier to choose the appropriate handle based on the cleaning tool you have selected.

To begin, find your cleaning tool in the first column in the blue table. The handles we recommend are in the next two columns and are listed as either a primary or secondary option. The number listed can be found in the Handle Key yellow table where you will find a description and product code for your handle option.
